

# tips for success

## 01

### **Schedule time to start right**

The hardest part is the first time you put it together so set aside enough time to do it all and do it well.

## 02

### **Check in frequently**

Every time you sit down to write, **START** with your board, moving finished items, and choosing your next to-do items.

## 03

### **Be accountable**

Either track yourself to make sure you're checking in with your organization or find a friend to hold you accountable. Choose a spouse if you're marriage can handle it! :)
